COMMENTS FROM THE TOWN MANAGER'S OFFICE

Last week this column called your attention to a new article in the warrant, which if approved would establish a reserve for a new fire station. The firemen meet every Thursday evening at the Fire Station and anyone interested to learn the present conditions under which this valuable equipment is housed may personally inspect the premises and talk with the fire chief or any of his men who will gladly explain the current situation.

The increase in the school budget is not being offset each year by an increase in new taxable property, therefore causing the tax rate to increase, resulting in a larger tax bill for everyone. For example in 1956 the total taxable property was \$5,917,519.00, while \$74,500.00 was appropriated for schools. In 1959 the total taxable property amounted to \$5,978,172.00, with an appropriation for schools of \$99,000.00.

Town reports were distributed by mail on Saturday, Feb. 13. If by chance anyone was overlooked a copy may be obtained by calling at the Town Office. Although Monday, Feb. 22, is a legal holiday in Maine, the Town Office will not be closed. The office is remaining open to accommodate those who still wish to pay their excise tax.

Snow removal costs for Jan. 1960 were \$2,229, which includes \$804 for a carload of salt. One year ago \$3,295 was expended, including \$984 for salt, which covered the same period.

Even though it has been a good winter the amount of sand used is about average. There has been a number of small storms or surges that would require just as much sand as if each storm had been a number of inches.

Sincerely,
Harold L. Bean

WHAT ARE THE JAYCEES?

The Jaycees is a civic service organization for young men between the ages of 21 and 35, inclusive. It is dedicated to two purposes:

1. Improvement and development of the community.

2. Improvement and development of its individual members to train them for business advancement and civic leadership.

In short, a Jaycee chapter is an organization of young men learning civic consciousness through constructive action!

This, then, is an organization specifically designed to meet a young man's need. Only in the Jaycees is it possible for a young man to assume leadership in community betterment at an age when such leadership would be denied him if he were competing for offices with older and experienced men.

The Jaycees is a federation of over 3,300 local organizations. There are active state Jaycees which are in turn composed of local groups within the respective states.

There are active affiliates of the Jaycees in every one of the 50 States. There are associate affiliates in 88 countries throughout the world.

A Jaycee pays the obligation that every citizen has to the community in which he lives in the pleasantest possible way—through civic service in cooperation with others. He meets and becomes friends with the very people he would be likely to seek for companions and acquaintances. Jaycees are alert, enthusiastic, ambitious men from all walks of life.

A young man owes a debt of gratitude to the town which provides him a home and the privileges of citizenship. Through the Jaycees, young men are given the opportunity to do their part in civic service pleasantly and profitably.

The Jaycees are a Junior Chamber of Commerce in name only. It is expected in the near future that the club will be known as the Jaycees, and not the Junior Chamber of Commerce.

The Jaycees will be more than happy to cooperate with any local organization, as long as it is within its Constitution.

Says President Dwight D. Eisenhower, "Yours is one of our nation's most distinguished and enterprising organizations. You are young and responsible people, with impressive careers and achievements already recorded to your credit."

The American Legion Auxiliary met for their regular meeting Tuesday evening at the home of Alta Meserve. Twelve members were present.

STATE POLICE WARN OF CARBON MONOXIDE

Is your life—and the lives of loved ones—being endangered by carbon monoxide from your car's exhaust system? The State Police present these facts on deaths from carbon monoxide, the so-called creeping killer, as cited by the National Safety Council.

1. Each year more than 300 persons are victims of the poisonous gas. This includes motorists who warm up their cars with garage doors closed, auto mechanics who repair cars in closed garages, and people who sit in parked cars and leave the motor on to keep heater or air-conditioner operating.

2. Somewhat less than fifty persons a year, as revealed by medical examiners' reports or autopsies, are victims of carbon monoxide while their car or truck is traveling the highway.

Though statistics may show relatively few lives lost in moving motor vehicles from this cause, most safety men say the total number of deaths isn't clearly known. One such official says: "We suspect that many one car accidents, rear-end collisions and accidents in which the driver says he fell asleep are caused by carbon monoxide."

The Council lists these symptoms of carbon monoxide poisoning: tightness across the forehead, followed or accompanied by throbbing in the temples, headache, weariness, weakness, dizziness, nausea, loss of muscular control and increased pulse and respiration. If you're driving at night and the darkness seems blacker than usual, the glare of oncoming lights brighter than usual, carbon monoxide may well be the cause.

"Fresh air," the Council says, "is the one sure way to prevent carbon monoxide poisoning." Checking muffler or exhaust pipe will enable you to detect danger before it's too late. Other suggestions from the National Safety Council: "1. Before starting engine, open garage doors wide. 2. Never

WEIGHT CONTROL GROUP TO START IN BETHEL

A Weight Control group will get underway on Friday evening, Feb. 19, in Bethel. This group is planned especially because of the interest shown in this project by the many people who are working during the day.

The first meeting will be held at the Primary School building and will start at seven o'clock. At the first meeting, the time and place of succeeding meetings will be decided.

This project, which is being carried on by the Extension Service of the University of Maine, is for the public. Anyone who is interested is cordially invited to take part in it.

A series of sixteen meetings of one hour's duration will be held. A diet pattern will be given, exercises outlined and suggestions on menu recipes, etc., given.

Those participating are weighed each week and keep a chart of the weight lost. A possible loss of one or two pounds each week is the aim of the program.

Check Yourself Before Driving

By Martha Johnson
Dodge Safety Consultant

Are you fit to drive a car?

You may think you are in good health. You may have an excellent safety record. Yet, under certain circumstances, it can be dangerous for you to be in the driver's seat.

Before you take the wheel of your car, read through this list prepared by the American Medical Assn. in co-operation with the Center for Safety Education, at New York University.

- Don't drive when you have serious problems on your mind. Emotional upsets may cause accidents.
- Check your attitude. Be mature.
- Don't make a date with the sandman while driving.
- Some medicines and driving don't mix.
- Alcohol and gasoline are a dangerous combination.
- Cleanliness is vital.
- Don't take the wheel if you are bothered with nervous disorders.
- Don't drive if you have a heart condition unless the doctor gives his OK.
- If you are diabetic, check with your doctor about the wisdom of driving.
- Periodic check-ups are a good idea if you are past 55.

"SIGNS OF LIFE"

To help everyone know his safety sign language, the Maine Highway Safety Committee explains the meaning of the six basic sign shapes on our streets and highways.

"The Signs of Life" state the law, warn of hazardous conditions, and afford assistance to—and protection for—all highway users. Prompt recognition of signs, signals, and markings can do much to keep drivers out of highway trouble," emphasized the committee.

SUNDAY RIVER

— Mrs. R. M. Fleet, Corres. —

We are sorry to hear that Mrs. Daisy Crosby had the misfortune to fall in her kitchen at Orono, breaking her hip. She underwent surgery Feb. 15 at Eastern Maine General Hospital at Bangor.

Our rain of Thursday, Feb. 11, left plenty of water in the road between John Nowlin's

and the bridge by R. M. Bean's. Earl Williamson has been home a few days with a cold upset.

Several from this neighborhood attended the play given at Bethel for the Pollo drive Friday evening.

Darnita and Eldon Yates spent Friday evening with their grandfather, Estes Yates.

David Fleet was home from Magalloway over the week end.

Mrs. Mary Morin has company from Massachusetts this week end.

Robert F. Bean called on his parents, the R. M. Beans, recently.

Mr. and Mrs. Arthur Myshall and son of Andover called

Friday at the Bryce Yates'. Twenty-five years ago today, Feb. 15, the town broke the roads with a big tractor. We had about eight inches of snow and David Fleet was born early in the morning. This year they are breaking the road with a truck and plow with only about four inches of snow and rain. The driver was Roy Bennett both years, but as I remember the wind was not taking part in the event as it is today.

ARE BUILDING STOCKS OVERLY DEPRESSED?

The mildly pessimistic predictions that have been voiced about the prospects for the building industry for 1960 may be in for some revision. If current reports can be used as a partial yardstick for forecasting this year's prospects, then the near term future is brighter than recent projections. Home building could exceed the one million two hundred thousand estimated starts.

Building issues were extremely poor market performers last year and have been so far this year. In 1959 building issues advanced as a group only 4% by year end in contrast to the overall market which improved better than 2.5% based on Hempill Hayes Dollar Averages. In January of this year with the market down 6.7%, building stocks slumped 7.2%.

It appears that present pessimism about the industry has been overdone and that the group does not deserve the poor investor rating that it has had over the past year.

Probably no piece of unfavorable economic news has received so much attention since the steel strike as the impending downturn in home construction. Predictions that housing starts would fall to the 1,200,000 level from last year's estimated 1,250,000 was widely heralded as one of the more depressing factors in an otherwise rosy economic forecast. Yet at the close of last year, while many were bemoaning this down trend many

builders and others close to the industry were optimistically forecasting a good year in 1960. Now, one key housing indicator has shown a substantial rise in December and has given indications that the expected slow first half may show a better construction pace than originally envisioned.

In December the Federal Housing Administration received 13% more home mortgage applications than it did in November. This is an unusual jump because applications normally show a seasonal decline in December from November. While this may be a fresh bunching of applications, it nevertheless, sharply reversed a declining trend which occurred in the last half of 1959.

One other bullish factor is that actual new home starts in December were greater than initially expected.

There are many building companies that are expected to report higher earnings this year than last and several that appear to offer interesting prospects at present levels. Among issues that we especially favor at this time are Pittsburgh Plate Glass, National Homes and American Radiator.

When the moose did not move or show any interest in them they put him into the trunk of the car and took him home. The game warden was notified and came to look at him. They could not determine whether the moose had pneumonia or another sickness. The trio kept him in the barn and fed him tender sprouts which the warden recommended. He ate very little and lived only until the next morning. Then Warden Kearney and a state biologist came to the Curtis farm to perform an autopsy on the animal to determine the cause of death.

A radio-aid with a blackboard, the Hope
speakers will help the often lonely few
local medical technicians train better.
The result: many more hands. And the
more one Hope dollar is multiplied
many times over.

YOUR HELP CAN COME BACK A HUNDRED TIMES OVER

One local doctor for 100,000 people. These are the odds Hope
may face. Yet Hope can mean so much. The health of one child.
The health of one Indonesian. Trained hands and only a dol-
lar's worth of goodwill can save them from slipping away.

If enough of us help, the U.S. Hope will be outboard
in 1960. First port of call: Indonesia. A bold health
project called Hope will be underway.

The need is crucial. Many places, too many health
hazards exist. Too many people robbed of the will to
live. Too few hands to help. Often, a doctor for 100,000.

Hope's approach is practical. Help where a nation's
doctors ask help. Help them help themselves to health.
By training, upgrade skills—multiply hands. Hope's doc-
tors, dentists, nurses, and technicians will man a center
complete to 300-bed mobile unit and portable TV.

You can not only make money. You can also work for
money. You can earn a priceless dividend. With health
comes self-respect. People at peace with themselves are
less likely to war with others.

Hope is yours to give. It's a nation's people project.
For one year's worth, 34 million Americans must give
a dollar. Don't wait to be asked. Mail a dollar or more
now to HOPE, Box 9808, Washington 15, D.C.

Three Milkmaids Tops With 4-H

Sally Austin

Ruth Fox

Three teen-aged milkmaids who like to blend milk in a soup or bake it in a prize-winning pie were Maine's top winners in the 4-H dairy foods demonstration contest for 1959.

All three were awarded 18-jewel wrist watches by the Carleton Co., the Cooperative Extension Service announced.

Ellsworth High school junior Sally Austin, 15, was state winner for her individual demonstration on how to make "golden penny soup," a vegetable cream of cheese soup to be served with Brown-eyed Susan salad, hot butter roll and milk.

An individual 4-H member, Miss Austin has been winning Hancock county demonstration

contests since 1953, her first year in 4-H Club work.

The state's winning 4-H dairy foods team demonstrators were Sandra Finnemore, 16 (not pictured), and Ruth Ann Fox, 15, both of Athens, who showed how to make "graham cracker pie" with custard filling and meringue topping.

"The first practice pie we made was lumpy and so were our speeches," the girls say, adding that it took "25 to 30 pies" before they could get the words and ingredients to fit together properly and produce a tasty pie.

They are members of the Athens Hustlers 4-H Club and students at Somerset Academy.

WORTH MORE BECAUSE THEY WORK MORE!

Compare this list of Chevy advances with the features ordinary trucks are still talking about. You'll see why Chevy trucks get more work done in a day... why they go extra thousands of miles before trade-in time. These Sturdi-Bilt Sixties aren't just new, they're a full scale revolution!

TORSION BAR RIDE

Each front wheel, suspended independently of the other, is free to step individually over bumps. And shockproof torsion springs up front crank up the jars and jolts before they reach the body. With three rugged new tailored-to-the-truck rear suspensions to further reduce road shocks, Chevy gives you the smoothest truck ride you've ever felt.

NO SHIMMY, NO WHEEL FIGHT

Drive a '60 Chevy. Just once. Right away you'll notice the absence of beam sway and wheel wobble common on ordinary trucks.

With independent front suspension there's a brand-new, smoother, easier handling feel behind the wheel.

CABS FOR BIG GUYS

Big guys get a bigger break in a Chevy cab. There's plenty of space inside to stretch out and relax; more room for hats and bags, more room for wide shoulders and long legs. There's horizon-wide visibility through a windshield with 26% more glass area; a new see-at-a-glance instrument panel.

6'S SWORN TO SAVE

Chevy's 6-cylinder engines are set to squeeze extra miles out of every drop of fuel. They're long famous for low fuel consumption, high performance.

SHORT STROKE V8'S

Power-packed for peak performance, Chevy's husky V8's make child's play out of the toughest hauls. They have a mind tuned to economy, too, that keeps costs down, profits up.

SLICK NEW SUBURBAN CARRYALLS

These handsome new handy haulers "double in brass"—can transport eight passengers or up to 950 lbs. of payload. Rear and center seats are easy to remove and replace when necessary. For work or for pleasure, these double-duty beauties are best for both!

NEW DOLLAR-SAVING PRICES

Chevrolet's low prices make big truck news for '60. They mean money in your pocket on model after model. Step-Vans, 4-Wheel Drives, many light-duty models with automatic transmissions—all are lower priced. Also, prices have been reduced on all optional V8's.

SEE YOUR DEALER

It could be the most important visit you make in '60. When you've seen these new Chevies, you'll agree they're the world's most advanced trucks. Then drive one and find out why.

FARMING LEADING IN LOCAL PROPERTY VALUES

An interesting survey of business in town reveals that by valuation records agriculture still heads the list, according to figures compiled by Assessor Harold G. Bennett. These statistics would indicate the amount of taxable property apparently involved in farming projects and its importance in the town's economy, rather than a proportional value of materials used and finished products. The tabulation shows:

Agriculture	\$822,502
Woodworking mills	551,265
Utilities	398,260
Hotels and restaurants	322,460
Stores	182,085
Gas and oil	120,627
Garages	73,265
Banks	44,360

Mansfield, Pa., Advertiser: Recently New York and other large cities have had an outbreak of juvenile crime of the most ghastly and vicious kind.

...However, we people in the small rural communities need not congratulate ourselves too quickly. We may have escaped the heaviest impact of the juvenile crime problem but we are not entirely free. The FBI reports that last year juvenile crime increased twice as fast in small communities as in large. They blame this on excessive coddling of teenage criminals and on parental irresponsibility.

The Shamokin, Pa., Citizen: There should be no hesitation to be firm with erring youth. The community stands in the place of a teacher to its young. Just as a "soft" teacher is despised by his pupils, so will an irresolute community be held in contempt by teenage gangs that find their "power" unchallenged.

SEN. MUSKIE HONORED BY MAINE 4-H CLUBS

United States Senator Edmund S. Muskie of Waterville has been honored as "an outstanding former 4-H member." Senator Muskie as a boy in Rumford was active in the 4-H vegetable gardening project. He won first and second places in 4-H exhibit competition. He was in 4-H club work for five years.

Of 4-H club work, Senator Muskie says, "The values of such training for young people almost speak for themselves. A lot of the land I think in basic with most of us. It's associated with solid accomplishment. These are worthwhile incentives to develop in any youngster."

Also recently honored in the National 4-H alumni recognition program of the Cooperative Extension Service was Mrs. Carlene R. Hillman, formerly of Lewiston. She is now teaching at Douglas College, Rutgers University, New Brunswick, N. J.
